Re: Request for Information (RFI) on Broadband Coverage in Auburn, NH

Dear Bryan:

By an affirmative vote of the Auburn Citizens Fiber Broadband Advisory Committee at their May 3, 2021 meeting, the Town of Auburn is requesting broadband coverage information to identify served and unserved locations in the Town as defined by NH RSA 38:38, I (c). The Advisory Committee was formally appointed by the Auburn Board of Selectmen at their meeting on April 19th, 2021 to act on the Town's behalf in this area.

For this purpose, an unserved location is defined as a location that does not have access to at least 25 Mbps download/3 Mbps upload speeds (25 Mbps/3 Mbps). The location does not have to be subscribing to this service if available, but the service must be available at the street location to qualify as served.

We require you to provide a list of street segments identifying first and last serviceable addresses for your coverage area and a spreadsheet list of served locations to meet this request. The list must be clear with locations easily identified by their street address and must include the speeds (upload and download if asymmetrical) of service available for each location.

The Town of Auburn is making this request according to the provisions of NH RSA 33:3-g, III to potentially pursue the option of utilizing municipal bond funding for the purpose of upgrading the broadband infrastructure to meet or exceed the 25 Mbps/3 Mbps specification.

Once either information is received or two months have passed from the date of this letter, the Town of Auburn may consider your service area as unserved and may issue a Request for Proposals (RFP) for the purpose of improving broadband infrastructure. Proposals would be sought from all providers interested in entering into a public-private partnership with the Town of Auburn for this purpose.

Please contact me by telephone (603-483-5052) or email (townadmin@townofauburnnh) if you should have any questions.

Thank you for your consideration.

Sincerely,
TOWN OF AUBURN
